Subject: Fwd: Other Municipal River Water Testing Labs

Kris,
This should be fairly easy to obtain from our records...send me a list and I will forward to the city. I am also not aware of a source water assessment for the Flint River watershed.

Subject: Other Municipal River Water Testing Labs

Mike,
Could you tell me which municipal water systems in Michigan treat river water? I know Ann Arbor uses the Huron River and I believe there are cities using the Detroit River. I would like to get a contact for their labs so see if they could sample and test Flint's water production. This would be an independent source of testing, in addition to our own.

I am also wondering if MDEQ did a source water assessment of the Flint River? Could you direct me to where I might find that report?
