Subject: Karegnondi pipeline questions

Good afternoon,

I am the public health reporter for Modern Healthcare magazine (published by Crain Communications, the same company that publishes Crain's Detroit Business), and I am working on an article about the problems with Flint's water supply.

I have two basic questions:

When will the Karegnondi pipeline be finished?
When will Flint residents receive Lake Huron water from it?

If you could also tell me how much it is expected to cost, that would be helpful, too, but the first two questions are the priority.

Thank you for your consideration,

Andy Robeznieks
