Subject: Flint Water Emergency

Hello Brad,

Did you see this?

<http://www.msnbc.com/rachel-maddow/watch/toxic-water-tragedy-points-directly-to-snyder-588635715518#ArrestGovSnyder>

As an employee of the agency that is supposed to look out for the health of Michigan's citizens by preventing environmental disasters like lead tainted water, did you really help the governor perpetuate the lie that there was no problem as suggested in this news report?

I really would like to hear your side of the story because I do not want to believe that an MDEQ representative entrusted with our health would perpetrate such an evil thing as this.

Bryan Hill
