Subject: FW: Pb/Cu FOIA (FOIAS # 0587-0617)
Date: Tuesday, November 03, 2015 8:57:21 AM

Richard, if the requestor ultimately modifies their request after speaking with you, they will need to do so in writing per FOIA policy and please have them send it to DEQ-RMD-FOIA@michigan.gov so Tammy sees it.

FYI for tracking purposes Carolyn...this is in regards to the plethora of FOIAs that came through for the same topic (FOIA 0587-0617).

Thanks,
Tracy Jo

Subject: RE: Pb/Cu FOIA

After discussing this matter with Kris Philip and others here in Lansing, I am planning to call Farough & Associates tomorrow to see if they will clarify their request. For those of you that have received this request for a water system in your district, we want to respond consistently. We need to know if they are primarily interested in LCR information, or are they requesting additional compliance data. A broad interpretation of their first bullet could imply they are looking for all correspondence related to compliance with the public water supply program and Act 399. We would also like to know what they mean by "water testing standards and protocols." Is it just water testing protocols, or is it protocols for the PWSS program in general? I will let you know as soon as I get a response.

Subject: Pb/Cu FOIA

Steve said that around 30 FOIA requests for Pb/Cu information went out from Farough & Assoc. so I assume we all got some except maybe Chuck. Should we just handle individually in our districts and then maybe make an extra copy of whatever is provided? The request was pretty broad, so we will provide all correspondence that relates to Pb/Cu from 2011 through 2015. It doesn't appear that they are requesting actual results though. Just wanted to see if we're all on the same page.

Here's the FOIA: <U:\Transfer\FOIAs\2016FOIAs\0600 thru 0699\0601.pdf>
