FYI. This message may provide an opportunity to notify the 6th floor of our plans to have a "conversation" with our district and Lansing staff so they don't "stumble" if contacted by their water systems or the media.

Subject: Saginaw and Bay County

Both the city of Saginaw and Bay County have been contacted by the news media, TV 5 and the Saginaw Daily News, regarding the lead issue. Both will explain their current treatment processes and lead sampling results.

Also, Bay County will indicate that they switched to a better quality water, are practicing corrosion control, had replaced numerous lead services and that other communities on the Saginaw-Midland pipeline with the same treatment system have not experienced problems.

In my telephone conversations with the two systems, I reviewed the situation in Flint to best of my ability.
