This request specifically mentions sampling of schools, so I don't think the templates for compliance sampling developed for community water supplies to possibly distribute to homeowners when they are conducting compliance monitoring is needed for this response. The sampling protocol for collecting first draw, lead screening samples at Flint schools a couple of weeks ago was tweaked by the Lansing District, so they should have the final version and be providing it in response to this request.

If you are going to provide the recently drafted protocol for lead exposure sampling that was conducted following the plumbing assessments at Flint schools, I believe that should be all of the documents from the community program that are being requested.

Let me know if I am missing something.

ODWMA central will take care of responding to this request.

Richard and Dana – please see below. We'll need to produce/compile all of our lead/copper sampling protocols. We'll need instructions to schools in the Noncommunity program and we'll need instructions to homeowners in the community program. Thanks.

I'll take care of providing the recently drafted sampling protocol for schools.

Please forward to appropriate staff (Benzie, etc. if necessary) it already went to Lansing DO.

Thanks,
Tracy Jo

Here's another FOIA regarding Flint's water. I am assuming that the Lansing District Office (LDO) has all the information that this FOIA is requesting (they also received this FOIA), but, just to be sure, please read the FOIA and let me know if you have anything LDO doesn't.

Thanks!
