I'm assuming that you folks in the district will be compiling this for Brad.

Any estimate on a time frame?

I need a comprehensive picture of lead and copper tests, please. At the plant tap, in the lines, figures we got from the city during the L&C rule tests. Everything. Thank you.

Hey Brad,

'Just making sure you saw this. Can you help me out? I know it's probably been a hellish couple of weeks, but for what it's worth – weekend's almost here....

Hey Brad,

I know we've talked about all the testing that was done on the Flint water. I'd like to drive home how much testing was done.

Can you give me a time line of the tests? I believe there were the 7 tests done from the source, and

then the two supplemental tests that confirmed ppb lower than 15 (6 and 11).

I know, I know. You've probably explained this 422 time to 422 different reporters (I'm guessing).
Can we go over one more time so we have it nailed down on a time line? If it's easier, a phone call works too – 313-222-2708.

Robin
