Subject: Brad Wurfel and Flint water problems

Dear Mr. Wyant,

As the facts slowly come out it is clear that more than "mistakes" were made. The Michigan DEQ did not heed or listen to the voices of other experts claiming there was indeed a problem with the water. In fact Mr. Wurfel went out of his way to discredit the results of the Virginia Tech team, the Hurley Medical Center, the EPA, and the voices of Flint citizens. His comments were rude, arrogant and condescending. Mr. Wurfel should be removed from his post. Trust on anything he says is gone. Surely the Michigan DEQ can find someone to be their voice who shows care and empathy for the citizens of Michigan and their concerns. I truly, for the life of me, do not understand why the DEQ took this tone. If there was ANY indication that something was wrong with the water then everyone should have worked as a team to determine and solve the problem. The DEQ took just the opposite approach and in doing so many many adults and children may have permanent health issues.

I hope not to read any more statements from Brad Wurfel. His voice is not one of honesty and integrity.

Ruth Wilson
