Subject: RE: WRD - PEAS - Oil Sheen

I notified the city -- Brent Wright (WTP OIC) of the situation given that this just upstream of their WTP intake. Brent and his staff will go out to investigate. Based on past history, he is speculating that it is a break in their lime sludge line. This line is located close to the Flint River in this area and has experienced breaks in the past. I also provided Brent with the caller's name and suggested to contact him and let him know that the city is following up on this incident.

PEAS Form

2014

revised July 23,

**First Response please "Reply All"
to receipt of this PEAS Notification ASAP.**

**Media: Water
County: Genesee
Ticket # 1498**

Incident Description: There is a sanitary sewer that runs parallel with the Flint river that has had several line breaks. This is causing a sheen on the water. Some of this has solidified along the river bank and is white in color. This is approximately ¼ mile down the bike trail where Bray Rd. ends S of Carpenter. Whatever is coming out of the line, is coming out steady. Caller has photos if needed.
