I think that is a great idea. I am constantly being asked about what is going on in Flint by other district staff.

If you haven't already been informed by your supervisor, we are planning a conference call with the ODWMA district staff to be held in the ConCon Conference room at 11 AM on October 8th to provide an update and explain what has been happening and what we are doing in response to concerns about increased blood lead levels and possible lead exposure in the city of Flint. We realize that many of you may be receiving questions about this matter from your contacts at water systems in your district or at local health departments.

If you work in Constitution Hall, you are invited to the conference room. If you will be in one of the district offices or at a remote site, you may call in to the conference number that was provided to all ODWMA supervisors, but hopefully you will do so as a group.

I will try to let Liane and Steve do most of the talking so we can get out of there in an hour or two.
