No restrictions are typically imposed for non-acute MCL violations.

Ouch! Does that mean there are continued restrictions for the users because the city technically remains out of compliance?

Yes. The MCL violation is based on a running annual average, so even though the city has made dramatic reductions in their disinfection byproduct levels since the initial high results, it will take a couple of more quarters for them to reduce the running annual average below the MCL at all 8 monitoring sites.

Thanks Richard. I will let your operators know. Do you see this issue continuing for a while?

Mike Prysby first, then Steve Busch, then Adam Rosenthal, all in the Lansing District. Oh, then me or Liane.

Hi Richard, OEA is getting calls and emails on the Flint drinking water issues. Do you have a contact person on that?
Steve Busch?

Thanks.
