Karen, I do not have a contact in water to send this to. Could you please see that the correct person sees this?

Thanks,

Cari-

I just finished listening to the WUOM's special report on the lead in Flint's water supply. How could you allow this to happen? You first denied that a problem existed and then ignored or tried to embarrass those experts who tried to move you into action. You should do better for the residents of this state.
