Excellent. The final table is attached. We are working on finalizing the letter now. Are the provider and parent letters being sent out by GCHD?

As far as dissemination, I think the protocol can go out with the provider letter.

Good for me.

Folks, what is the dissemination plan for the protocol? Can this go to providers? THOUGHTS?

I will defer to the entire group as we have not been making that distinction. Most of the stuff done both at GCHD and PCPs is screening not testing. Might not want to confuse the matter.

Do you want the language to continue to say "Testing Available at GCHD"? Or did we want to edit the language?

I like Mona's idea of creating a "Second" column under **Testing Methodology**" placing GCHD as the second of three in that section. In that case remove "Testing available at GCHD" from the third column.... and in all reality.....the bulk we are talking about screening not testing.

You can of course do whatever you want, but GCHD is an independent and constant place to get blood tested -- it is not one of these community/health plan events that are popping up to do single day mass screenings.

If you were to prioritize testing methodologies, it would be primary care doctors, GCHD and then least-preferred would be the anti-medical home community/health plan events. So GCHD should actually be the second column.

And under the GCHD, it would include the process - walk-in, appt, lab test, etc. Toni can clarify this.

But of course, it's up to you.

Instead of adding another column that would say the exact same thing in every row, we added a line to the community column as the GCHD is located in the community. The language says: Testing available at GCHD.

If that language should be more expansive or detailed, I'm open to suggestions.

I think I have emailed this about ten times already, there needs to be a third column under testing methodology titled GCHD -- that is an independent site where kids can get blood lead tested- separate from the primary care providers and separate from community/health plan events.

Attached is a cleaned up version for Priority 2.

Can someone help me understand the difference between the priority levels? Now that P2 and P3 have the same actions associated with them, hoping to be able to explain why we've set these different audiences under different priority levels.

I agree with Toni - the case management contract with GCHD will be based on actual elevated levels (e.g. Priority 1), and CM will do outreach to those kids. They will not be offering CM to children who don't have a test showing an elevated level (e.g. Priority 2 and 3).

However, if kids from Priority level 2 or 3 DO have an elevated level, that would bump them up into Priority 1.

Subject: Updated Testing Protocol October 22, 2015

Good morning,

The updated testing protocol document is attached.

Based on emails from last night, I:

1. Removed the Hurley column
2. Did NOT include 2-1-1 in the testing protocol

Let me know if you have additional edits.

Emily
