I don't believe so and I can't seem to find a copy in my files. If you can send it to me, we can get it up.

Angela

Angela,
 Is the enhanced testing notice on the flintwater site?

Hi Eden: Do you want to get this posted on the Flintwater website? There's one to providers on there already, of course.

Subject: FW: Provider Message- Enhanced Blood Lead Screening- December 10, 2015

Good afternoon,

Attached again is the provider message regarding enhanced testing, and the need for providers to ask their Flint resident clients about whether they have had lead testing (particularly targeted to children 0-6) as well as whether they have filters. I have heard a few reports (anecdotal) that some clients are having to ask providers for testing, or that they are not being asked if they have filters.

Pete, is it possible to blast this message attached to your GCMS colleagues? Larry and Mona, I know the pediatrics folks may be already saturated, but if you think of other connections...

Eden

Subject: Provider Message- Enhanced Blood Lead Screening- December 10, 2015

Good morning,

Please see the attached message that has been cleared for dissemination to Flint providers.

Genesee County will blast fax and use their professional networks (GCMS, etc.) to disseminate to all providers.

I have CC'd Dr. Mona Hanna-Attisha and Dr. Reynolds here, and they can distribute through their networks as well.

Our Medicaid program will be working with the local health plans about lead screening recommendations based upon this message.

This will also go out as a low-alert from our Health Alert Network to appropriate Flint sites/providers, so I have CC'd Craig Henry.

If there are any questions, please do not hesitate to contact me.

Warm Regards,

Eden

Dr. Carravallah of our Board of Health suggested adding a line.

All people with Flint water should be advised to eat regular meals with a diet high in calcium, iron and Vitamin C to decrease lead absorption, mitigate the effects of lead exposure and to enhance the excretion of lead.

Hi Eden,

Below are the only other two things I can think of:

physicians can make referrals for case management at 810-257-3833

Call 2-1-1 for locations for filter distribution

Sending on behalf of Eden Wells:

Requesting review of proposed language below for HAN to providers regarding enhanced EBL testing.

Thanks! Corinne Miller, MDHHS State Epidemiologist

Michigan Medicaid Early Periodic Screening, Diagnosis and Treatment (EPSDT) guidelines require children to be tested for blood lead poisoning at 12 months and 24 months, and between the ages of 36-72 months if not previously tested (<http://www.mdch.state.mi.us/dch-medicaid/manuals/MedicaidProviderManual.pdf>). Due to the enhanced public health issue of an increased risk for lead exposure in the City of Flint, providers have been advised to follow enhanced guidelines for lead testing in children:

- Providers should screen ALL children (regardless of Medicaid/insurance status) aged 0-6 years of age exposed to Flint city drinking water after April 2014. Note: this includes all children younger than 1 year and children between the ages of 3-6 years.
- If the child has already been screened within the time period of April 2014-present by a capillary test, healthcare providers should follow-up on any elevated levels >5mcg/dl to ensure confirmatory venous testing is conducted.
- Utilize the standard Blood Lead Level (BLL) Quick Reference for Primary Care Providers at http://www.mi.gov/documents/deq/ProviderQuickReference_Sept_2015_501831_7.pdf?20151204122739

- All clients with blood lead levels greater than 5mcg/dl should be referred for case management coordinated through Genesee County Health Department.
- Providers should inquire about use of a drinking water filter and/or bottled water in all clients residing in city limits.
- Healthcare providers should inquire about other potential sources of lead in the household per current recommendations (see: https://www.michigan.gov/documents/mdch/testing-screening071009_287511_7.pdf)
