Agree,

Linda, can you get the communications people to fix up?

I remember this came from another source (?CDC) rather quickly--and needs to be further adapted to needs of Flint (no tap water/flushing, etc)--

For right now would pull off website?? CC'ing our website folks too....

Dr. Larry Reynolds had some concerns about the nutrition hand out that we have been using regarding 1 minute cold water flush and washing fruit. See below. Can MDHHS weigh in and potentially revise?

Toni L LaRocco MS, RN

Director of Nursing Services

Genesee County Health Department

"Gratitude unlocks the fullness of life. It turns what we have into enough, and more. It turns denial into acceptance, chaos to order, confusion to clarity. It can turn a meal into a feast, a house into a home, a stranger into a friend. Gratitude makes sense of our past, brings peace for today, and creates a vision for tomorrow." - Melody Beattie

I thought we agreed - no unfiltered tap water for washing food or cooking. Where did this one minute flush before using tap water recommendations come from. See attached document linked to the Genesee county website- simple steps you can take ,bullet point 7. We cannot use this in Flint without editing.

My plan was to use this in a Community Ed talk since the pictures and layout were so eye appealing .We will have to review all handouts.

Believe me, I am not interested in playing gotcha. We need a consistent ,accurate message for Flint residents on all water materials, not general advice.
