As per our discussion just now, in 2014, 913 kids age 6 -17 were tested in Genesee and 6 had a BLL =>5. (This includes Flint and is whole year, not april-Dec)
For Flint alone in 2014, 428 were tested and 5 had BLL =>5 in 2014. (i.e. 5 of the 6 elevated lived in flint)

For 2015 through November, 1,197 were tested in Genesee and 10 were elevated.
For flint alone in 2015, 765 were tested and 8 were elevated.

I hope this helps.
