Subject: request review Flint provider forum

Debbie,

Please review the proposed outline for the provider meeting in Flint. On the planning team (members TBD) I have staffs from Medicaid, Childhood Lead Poisoning, WIC and the Genesee County Health Department. Eden, of course, would also be on the planning team.

Provider Forum – date TBD but Eden was thinking the second week of January

Target Audience: health plan medical directors, Flint health care providers. Invitation also delivered to health plan CEOs but target is providers

Desired Outcomes:

Providers are up-to-date on 1) the Flint water situation and the public health response; 2) their role in testing, education and follow-up of children; 3) the type and location of resources available to them.

Public health and Medicaid gain knowledge: 1) to enhance outreach strategies to maximize the testing of children in Flint; 2) about the barriers that providers face in such testing and follow-up;

“Drafty” meeting outline

Summary of event (Mona)

Public health response, including available resources (Wells)

Lead 101 (Eden to ask Mona if this is needed; if yes, could Mona do this?)

Medicaid: testing, case management, commitment (Debbie)

Provider feedback on outreach strategies, challenges to testing, case management/follow-up

Q & A (maybe this follows Medicaid and then there is an open discussion to get provider feedback)

Debbie – your feedback is appreciated!

Corinne
