Subject: RE: Newborn

Just had a CLPPP meeting and Nancy stated that they are working on getting a follow-up test and they would keep us posted...

Martha, please see if we have the report on this test and give Courtney a heads up so we can coordinate EBL with CM.

I'll be in after an 8:30 medical appointment.

Right, of interest is that this is cord blood from a newly born baby....!!! There should be NO lead...

Jori and Eden,
 Please see below. Please note that this is a result below 5. We are happy in this extended circumstance to follow this family. I am off next week and will need you Eden, to advocate with state for the follow up by case managers as it does not fit the specified criteria.
 Merry Christmas!

Toni

Looking forward to hearing from a case manager.

We started our cord blood lead research project about three weeks ago. We've tested about 150 cord bloods. Every mom (except 2) has consented to the research. We are only getting back results

now and we have not analyzed anything yet. It would be interesting to confirm if these cord blood results get to the state program.

Hurley delivers about 3000 babies/yr. Most of city of flint babies.

Good to know- we shall be sure one of the case managers contacts you directly for information-- how many babies are born at Hurley each mint? I.e., how many cord bloods are being tested?

Yes we are planning to contact mom, test mom, test baby (venous), test siblings, and contact PMD.
