Subject: Health plans and Lead data

Hi,

I just spoke with Bob Scott to verify whether Health plans had access to lead data. He is certain that they do have access to the lead data because he has received screenshots of the records that they provided to him when working on an issue.

Lead data that has been received by Friday is processed over the weekend by the warehouse and then available in MCIR. If the data is not in MCIR it is generally due to the Lead program not getting it processed by Friday and not the fault of the data warehouse or MCIR.

Thanks!
