Subject: follow up monitoring for Genesee PH

Here are the metrics that were included in our Case Management contract with GCHD:

Metrics for Contract Monitoring

Contract monitoring will be based on data recorded in the Healthy Homes and Lead Poisoning Surveillance System (HHLPPSS), Medicaid Claims data from the MDHHS data warehouse, and via weekly review and status calls.

1. Number and percentage of target children with elevated blood lead levels of ≥ 5 ug/dL that are successfully contacted and offered case management services.
2. Number and percentage of target children receiving case management services.
3. Number of Medicaid claims filed for children enrolled in Medicaid who receive testing or nursing assessment visits.

Karen – on your weekly calls, we will need to get updates on these metrics. We will need them organized based on the testing protocol, so we can understand what is happening for each group of children listed in that protocol, and then overall. Karen, I will send you some additional information, wanted to make sure we put this on our list to review together.

Wes – Karen has weekly calls scheduled with GCHD; do you want to have someone participate on those calls related to linking the case management and EBL investigation activities?

Nancy
