Subject: update on lead

Nancy,

I was on a call with Genesee County Health Dept this afternoon and wanted you to check in that you were working on getting data from the GCHD and reporting out how many were tested, how many followed up, etc. They (GCHD) will need to report out on these weekly when we do our call.

Also, I am on a call with CDC and GCHD – I was told about this 2Pm call at 1:30Pm. It appears that others have commented that the parent letter and attachments are too high a readability. CDC has comments on this too. They will provide a lead dictionary to explain the terms. I explained we have reviewed and created these document on the standard of a 6th grade reading level. They still thought that was too high. We also asked them to send info on water specifically. So, more to come on this or we may be asked to revise some of our materials.

Rashmi
