My grand plan to work on it before 8 was derailed by my freezing computer I'm on my 3rd shut down and restart. DTMB was more concerned about my non working touchpad mouse than the freezing. "Hmm maybe it will get better". "it's getting worse". Silence.
 I have some ideas about splitting the intervals so that they don't match up to quarters.
 I have some meetings this am but will look at it again if my computer will cooperate.

I take it back -- if we aggregate to high risk flint, you can still use the totals to back calculate currently suppressed quarters (example, 2010Q4 and 2012Q1, and 2013 Q4 in 54803). Something we need to keep in mind before sharing the other tables we have.

If she means the "Flint Lead by zip suppressed submit 100715" sheet, there are several zip codes (48503, 48504, 48506, 48507) where aggregating to year would allow for back calculating to suppressed quarter for least one instance. So we would have to collapse zips as well.

We could offer her by year, "high risk flint", "other flint" and nonflint I think. Open to other ideas. Hard to know what to suggest without knowing why she would want it.

Sarah and Patti,

I believe this one is up to you.

Thanks,
Bob

Subject: data aggregated by year

Bob,
 Thank you for the count data by quarter.
 Is it possible for you to aggregate it by year starting with q2 annually? So the data are comparable?
 Thanks!
 Kristi

I'd be happy to set up a time for you to speak with Linda Dykema and Sarah Lyon Callo regarding our prediction modelling. Might not be today, but I'll see what we can do.

We're working on the other questions as well, but it's a lot to get through -- will send updates as we have them.

For the list of taskforce members and the schedule of meetings, I'd recommend reaching out to DEQ.

I am interested in the name/title and contact information for all of the Taskforce members. I am interested in the meeting schedule for the group and what the next steps are in general.

It was mentioned on the call that the state has a team of toxicologists that will be doing some prediction modeling in Flint. I am interested in when/where tests are occurring and what the sampling frame looks like. So maybe a call would be a good first start.

Thanks!
Kristi

For the task force contact -- the contact would depend on the question. Can you tell me what you're looking for so I can be sure to get you in touch with the right person?

And for our toxicologist, are you looking to set up a call?

Yes,

I am looking for the quarterly numbers behind the percentages on the chart Jennifer shared. I was told I need to sign a release -- does this come from you Jen? To get the quarterly counts, in the meantime if you can aggregate the counts annually beginning with q2 that will help.

Summary numbers are fine for the second request, just looking to see what the investigation and remediation/clearance participation rates look like for those children identified with lead poisoning for communities receiving funding.
If that makes sense, if it doesn't maybe we need to chat over the phone.

Thanks
Kristi

P.S. Jen can you forward me the contact info for the lead on toxicology team and special task force for Flint?

Hi Bob:

Attached is the info we provided to Kristi on Monday. She would like the raw data behind the percentages listed. She would also like the annual data aggregated if that's a simpler, quicker request to fulfill.

Kristi -- please jump in if you want to clarify further.

Thank you,

Ms. Tanner,

I'm requesting clarification on a couple of points regarding your request below:

- Regarding "Actual numbers behind the updated analysis/chart and percentages," more than one set of charts & data were produced over the last couple of weeks. Can you be more specific on what you're referring to—maybe title and date?
- Regarding data on "investigation, risk assessment, abatement and/or clearance," I assume you're not asking for any individual or identifiable data, is that correct? Summary numbers only?

Thanks,
 Bob Scott

Subject: RE: Info attached

Thanks for the follow-up Jennifer.
 Per our discussion, I am interested in obtaining the following information

Specific to Flint:

- The logistic regression model discussed in the conference call
- Actual numbers behind the updated analysis/chart and percentages
- Contact information for the lead toxicologists working on the prediction modeling in Flint.
- Contact information for the lead contact for the Special Workgroup EPA/DEQ/MDHHS to address lead in Flint.

Communities that receive funding for lead poisoning prevention (Flint, Detroit, Grand Rapids, Hamtramck, Highland Park, Jackson, Lansing, Muskegon/Muskegon Heights and Saginaw):

- Any data that the state collects on investigation, risk assessment, abatement and/or clearance.

Thank you!
Kristi Tanner
