Subject: RE: Flint Situation/ Medicaid Data

Thanks to Medicaid for providing your expert advice to us.

Monica - I don't have an electronic copy of the letters but there were two. The following was one of the recommendations in the first letter:

MDHHS should set minimum blood lead level (BLL) screening goals among Flint children < 6 years of age enrolled in Medicaid at 80 percent with a more aggressive target of 100 percent. Goals should be monitored weekly and if not met MDHHS should establish progressively intensified screening efforts if goals are not met. Intensified screening efforts should be coordinated with local providers to minimize disruption of children's medical homes to ensure appropriate clinical follow-up.

 Subject: RE: Flint Situation/ Medicaid Data

<< File: Admin Quarterly PMR October 2015.pdf >> << File: PMR Specifications FY 2016 FINAL pg11-14.pdf >>

Hello,
 It was great to speak to you all this afternoon regarding Blood Lead Testing. As discussed, I have attached 2 documents.

The first document is the Blood Lead Testing results page from the October Performance Monitoring Report (PMR). You will notice that while the standard is set at 81%, all plans received a pass even if their scores fell below that standard. We discovered last quarter that the measure was inadvertently excluding children in the Children's Special Health Care Services program. That was correct and the plans' score reflect that change. Because it was an administrative error, we gave the plans a pass for the quarter.

The second document is the PMR specification for the Blood Lead measure. It includes details about age and enrollment criteria.

Please let me know if you have any questions about these documents, but while we are the keepers of the reports, Daisy is the genius behind the queries. You may wish to forward your questions to all of us and we can determine who has the expertise to answer them.

Lastly, I was wondering if any of you could forward the letter/inquiry from the Governor's Task Force on this issue. It would be helpful to me to see what the actual 'ask' was so I can most effectively contribute.

Thanks.

Monica
