Thanks! I did include Mr. Weber on my message today but can adjust that if need be.

We'll see what Mr. Weber says, I guess. The situation report distribution list may need to be changed in terms of the POC for MSP.

Good Afternoon Mr. Weber,

Please see the below response from Corinne Miller and the attached most recent Situation Report. Would you like to be added to the information distribution list as the POC for MSP going forward?

Thank you,

Jennifer Lixey Terrill, B.S., M.A.

Leadership has cleared distribution of the department's situation report.

There are also blood lead testing data for Flint that can be accessed via the Michigan.gov web page where there is a link for Flint water. The documents contain information on how many children have been tested and how many had elevated BLLs (5+). The website also contains some documents on MDEQ activities in schools.

Would Thomas Weber be the MSP point of contact for our distribution list? If so, we can add him and then he will receive the report that will be distributed today.

Corinne

Jen,

Linda Dykema and Corinne Miller are the leads for this incident. I have copied them so they can provide assistance to MSP. I don't know if the DHHS situation reports are cleared for release outside of the department yet. If so, we can send those to MSP weekly.

Subject: Flint water

Hi Jennifer,

We're going to be meeting with Flint's mayor later today. I'm curious what actual statistics the county health department may have on EBLs in Flint children between the time before Flint was on its own water vs. now. And also, how many kids are actually being treated or receiving extra treatment like chelation therapy?

Are those numbers you'd be able to get a hold of fairly easily?

Also, do we know what MDHHS and/or MDEQ are doing action wise? I know the mayor wants a Stafford Act declaration, but they make it seem as though that's the only avenue for real assistance which, in the case of an infrastructure failure, is the least likely avenue.

Thanks for anything you might be able to shed light on!

Tom Weber, PEM
