Subject: Weekly lead screening report for MHPs

Based on the response we received from all the MHPs we believe there will be great benefit to a revised report that we would design here that would give the plans more frequent results (weekly) for their members like the LHDs receive for children in their jurisdictions. Some plans are getting more frequent data directly from their lab vendors, however, that was not the case for the majority, so we would like to move forward with the report development as we have been discussing ASAP and make that available to the plans as another task on our workplan. Let Monica, Kim, Heather or I know if you have any questions. Who needs to get this moving?

K.
