The Brita On Tap Faucet Filter System is a newer model of Brita's popular On Tap Faucet Filtration system. It attaches directly to your faucet to provide filtered water whenever it is needed. The Brita OPFF-100 Faucet Filter fits all standard sized faucets and attaches easily without the use of tools. This Brita faucet filter system comes in a white plastic design.

The Brita On Tap Filter feature uses the [Brita FR-200 \(42402\) 2-Stage Faucet Filter](#). Changing the filter is easy and convenient because the electronic LED filter replacement indicator turns red when the filter needs to be

replaced. The filter lasts for about 100 gallons or around two months although filter life may vary depending on frequency of usage and water quality.

This Brita faucet filter is primarily used for the reduction of chlorine, lead, sediment, and dirt. However, it has also been NSF / ANSI Standard 53 tested for the reduction of many other contaminants and impurities including:

- 2,4-D
- Alachlor
- Asbestos
- Atrazine
- Carbofuran
- Carbon tetrachloride
- Chlordane
- Chlorine (99%)
- Chlorobenzene
- Cysts - Cryptosporidium and Giardia (99%)
- Endrin
- Ethylbenzene
- Heptachlor epoxide
- Lead (99%)
- Leaf
- Lindane
- Methoxychlor
- O-Dichlorobenzene
- Rust
- Sediment and dirt
- Simazine
- Styrene
- Toxaphene
- Trichloroethylene
- TTHM
- Turbidity
- VOCs

Subject: I am wondering if your faucet filtration systems are NSF approved and ANSI...

kleknes (09/17/2015 09:42 AM)

Hello Dawn,

Thank you for contacting us at Brita. We appreciate you taking the time to write to us.

We understand your concern and we will be happy to shed some light on the matter. The BRITA On Tap Faucet Filter System has been tested and certified by NSF International, the nation's leading testing authority for water filtration products. Our replacement filters for our faucet mount system is NSF 42 AND 53 Certified.

The latest information on our products being NSF certified can be found @ <http://info.nsf.org/Certified/DWTU/>;

We hope this information was helpful. Please feel free to reach out to us if you have any additional questions or concerns.

Again, thank you for contacting us.

Sincerely,
Consumer Services

Dawn Hallwood (09/16/2015 11:57 AM)

I am wondering if your faucet filtration systems are NSF approved and ANSI Standard 53? If so, could you provide me with documentation that states that. Thank you.

If you need to contact us in the future about this issue, please mention this reference number: 150916-000491
