Subject: Flint EBLI list

Sherry,

I have posted an updated file to your MIBLOODLEAD 112 area of DCH-File Transfer. Sorry it's so late in the day this time.

I have included children ages 6-17 who had EBLIs since April 2014, but I put them on a second tab. If a child started on the list at age 5, and is now 6 years old, that child is still on the first tab.

I've also included more columns this time than I have previously. I wanted to show you everything we have for this file. I'll be on the Tuesday call tomorrow, so if you want me to hide some of those columns, you can let me know.

Thanks,
Bob
