Sue and Eden,

FYI. We are preparing to send some documents to our Home Visiting Programs in Genesee County. These documents are a compilation of our talking points, education materials, etc. We will route through Communications for approval. Rashmi

Importance: High

Hi all – attached is a draft memo to go to home visiting programs working in Genesee County regarding the Flint water situation. This is built from the talking points and press releases issued by MDHHS. It is not formatted, figured we would finalize content, then take that step.

I've also included several potential handouts that I listed in the memo. Note that the Parent Handout is still being edited, so what is attached here may not be the final version.

Next steps:

1. Review the memo and share comments/edits (track changes is helpful for edits).
2. Once we are comfortable with the content, we need to route this through Communications Office for approval.
3. Then it can go out.

Nancy
