Thanks for the clarification! ☺
 Let us know if we can help or provide any tox fact checking, of course.

I think for right now, Michelle, this group is looking at what will be going out in mailings in the near future---but for longer term- shall defer to the rest fo the group

Please find it attached...

Would this group like to review future documents prior to going to the interagency group that approves for website posting? Or do you all see it through another pathway before it's put up?

The process isn't clear, and I don't want to cut anyone out...

Please do not forward this externally until it's approved by our MDHHS PIO.

Thanks!

Hi Eden:

The old version was already posted to the website: http://www.michigan.gov/documents/deg/deg-2015-10-14_-_Lead_-_Flint_Water_Fact_Sheet_02_503394_7.pdf

I have already forwarded Angela/Geralyn the updated version that was forwarded to you all by Toni to replace the current one. Hopefully it goes up soon.

Angela and Geralyn also have the health effects infographic that I created in partnership with our tox folks.

Would this team also like to review that?

Please let me know...
