Hi Amy and Eden, per Amy's request to edit our Parent Handout on our website.

We made an edit, on page 2, under "What can I do to protect my child from lead?" We added to the 3rd bullet, "Consider contacting your local water authority to have your water tested." (see attached)

Re-reading your email, were you also wanting us to add something about water to page 1, in the section about "What causes lead poisoning?" If yes, we could try to add text something like we have in the info sheet for Pregnant and Nursing Mothers and Lead (attached), where it references "Other sources of exposure may include soil and water..."

If that is more of what you are looking for, we can get that done either tonight or first thing in the morning. And/or if you have a specific sentence or phrase you'd like us to add, send it along!

Nancy

I know Karen's out - but I wanted her to be included. Please see Amy's email below. I have already replied to Amy that I would be forwarding to you for review and edits. :) Beth

Hi Elizabeth -

This document: http://michigan.gov/documents/lead/Parent_Handout_Sept2015_501802_7.pdf is one that we recently approved.

We should make sure it reflects that lead poisoning can happen from the water so that people should get the water in their home tested as well.

Can you please update this piece and send the rewording to us? Geralyn and Angela both mentioned that Dr. Wells would be a great resources for help with the language.

Thank you,

Amy
