Flint doctors from Hurley, etc., today are holding a news conference to urge Flint to stop using Flint River water ASAP because of alarming lead levels in kids. This is based on blood tests taken since January.

As you know, water quality has been a big issue in Flint, although officials, including DEQ, say lead levels are within limits. Now, doctors are speaking up and saying it's a public health crisis.

What is the governor's reaction? Should Flint stop using the water?

Thanks.
