Subject: RE: Internal Communications Meeting
Importance: High

One content piece that Director Lyon just indicated he heard from Director Wyant is that even after a switch to Detroit water, there is a 3-6 month period of time where they need to do extensive testing to ensure the water is safe from a lead perspective. Therefore we will still need to be providing filters and replacement filters for people in Flint so we will incorporate the fact that we will also be purchasing the replacement filters for citizens to use while the system is tested, refined.

Just wanted to make sure you had this from a message development perspective.
