**Subject:** Updated DHHS release with some additional questions  
**Attachments:** Flint EBL Data Press Release V8 D (003).docx

Good evening team,

Thank you for the continuing effort on this release. I know much hard work has gone into this. Meegan and I worked on the release – I appreciated her fresh eyes – and made some wordsmithing changes. Governor has asked for some additional information to be included as well. Most of the changes are marked in bold. Please review them.

Governor has asked:

**Do the elevated lead levels stick with a person for life?**

**Why do the lead levels spike on a seasonal basis?** We took a stab at answering this, but please review.

We also need a breakdown of the 1,361 people tested by child and adult, so we can say 21 of XXX children tested.... And 9 of XXX adults tested...

Thank you very much!

Dave
