The intern taking the message had it as d.emerson@gongwer.com. It didn't look right to me, so I sent it to the address I had on file. Just wanted to make sure you got the comment and weren't hanging out there waiting for a response.

Dave

What confusion? First initial, last name. The only exception here is Alethia Kasben's address, which is reversed, kasbena@gongwer.com. I get all the press releases and schedules? Speaking of, will there be one on the TED initiative he was attending earlier this afternoon?

Either way, confirmed. Thanks!

Danielle

Subject: Flint water infrastructure challenges

Hi Danielle,

Here you go. Can you confirm that you received this? We had some confusion about your email address.

Gov. Snyder spoke with Sen. Ananich this morning about how the state can continue working with Flint city leaders. We just received the letter from the senator and are reviewing his suggestions. We deeply share the senator's commitment to making sure all state residents have access to clean and safe water.

The governor and state agencies have been closely working with Flint leaders on their infrastructure challenges for months, including about providing \$4.2 million in grants and restructured loan financing to provide resources needed to locate and fix infrastructure problems and add the carbon filtration system.

It's important that people have accurate information about their health and water. The Department of Environmental Quality and the Department of Health and Human Services are testing water and working with Flint residents on issues related to what they can do if they have concerns about the pipes in their homes.

Thanks!

Dave
