For Immediate Release

Water System in Longway/Dort Area Fully Operational After Repairs, Conditional Boil Water Advisory Lifted

Flint, Michigan – October 20, 2014 – The City of Flint’s Water Service Center crews have successfully replaced four of the five valves scheduled for replacement this past weekend and are currently working on completing the fifth. The system in the area is being returned to full operation. No residential water service loss was experienced. Water quality analyses were conducted and have returned clean results which allows for the conditional boil water advisory to be lifted.
