I think that is a great idea.

**Subject:** Re: Technical Advisory Committee Meeting

Mike,

Please share with the advisory team: who is "we," that should decide that it's wise to postpone our meeting? I haven't seen any information that gives me reason to postpone.

The status of leadership and water are both evolving daily. Best that the advisory board continues to meet regularly (and perhaps even more frequently) and that the Dec 9 meeting not be postponed.

I'm grateful for the involvement of the EPA. Any time that they're available to meet with us, we should make full use of their help.

Laura Sullivan

 Advisory Team,

I am contacting everyone in regards to the Technical Advisory Committee meeting that is scheduled for December 9th at 2:00 p.m. At this time we have decided to postpone the meeting until after the start of the new year.

The city is on schedule to have the additional corrosion control measures in place in early December. We will update the committee on the implementation and the impacts we are observing throughout the water distribution system at the next scheduled meeting. We continue to have our City Hall lobby information window staffed along with an information screen, water filters, replacement cartridges, and sample bottles.

Sincerely,

--
