

I echo Mr. Schock's sentiment. Seems like a great time to let the technical folks like he and others with a similar skill-set get past politics and focus on building public trust.

Mike;

That's unfortunate, we were planning our travel around the meeting, and it seems like there is a lot of coordination and planning to do for the many possible studies being proposed.

Subject: Technical Advisory Committee Meeting

Advisory Team,

I am contacting everyone in regards to the Technical Advisory Committee meeting that is scheduled for December 9th at 2:00 p.m. At this time we have decided to postpone the meeting until after the start of the new year.

The city is on schedule to have the additional corrosion control measures in place in early December. We will update the committee on the implementation and the impacts we are observing throughout the water distribution system at the next scheduled meeting. We continue to have our City Hall lobby information window staffed along with an information screen, water filters, replacement cartridges, and sample bottles.

Sincerely,

--
