Subject: RE: Draft SMT Paragraphs for January 26
Date: Wednesday, January 28, 2015 11:05:00 AM

Not as late as some weeks.....

ODWMA reported that we are continuing to field inquiries regarding city of Flint's water issues and their violation of the drinking water standard for disinfection byproducts (total trihalomethanes, TTHMs).

We have also recently published a set of draft rules in the Michigan Register. The proposed rules address our need to adopt federal changes to the Safe Drinking Water Act, along with some additional housekeeping and other minor modifications. Our public hearing on the proposed rules is scheduled for February 18th.

In addition, this month ODWMA staff participated in the 64th Annual Onsite Wastewater Conference held here in Lansing. Approximately 500 people attended the conference; with over 120 state and local government representatives, 200 pumpers, 80 installers, and other industry representatives including designers and service providers. The conference was a big success.
