Could you please have any of your staff that oversee Genesee County NPDES and Non-Point Source regarding the Flint River respond to me directly.

I am working with EPA Region 5 in response to a letter to the White House regarding Flint drinking water. The complainant indicates they received a "Letter of Alert" in January 2015 regarding the detection of refrigerant and solvent contaminants in the Flint River.

I just need to know if WRD staff are aware of any monitoring in the Flint River that could be associated with this, and if they might know where this "Letter of Alert" could be coming from.

Thanks.
