Hi Kris,

Can you fill in the blanks in the last column for the number of lead service lines for Westland, Farmington Hills, and Dearborn Heights? Just have someone check their sanitary survey to see if they reported any lead service lines.

I got these numbers from the 2011 Needs Surveys, although a few came from the 2007 survey if they didn't participate in 2011. I know some have changed since then, but it gives an idea of what universe we are facing as far as lead service lines that may exist. I know Lansing reduced their number from about 12,000 in 2007 to just over 3,000 in 2011, and they may be well under 1,000 by now. But this data is the best we can do without asking someone to contact each system. Also, I didn't record a lot of communities that had no lead service lines unless they were already on the list as communities for which there was some interest to know their status.

Thanks for any assistance.

Richard
