Hi, Richard. Chooi has no record of the protocol, but Ed Moriarty at HQ is tracking it down, ASAP. I'll let you know when I receive something. The Paul Makoski at Calhoun Cty HD might have something; maybe Carolyn Krieger Hobbs, who works closely with Calhoun Cty, might know something, even though she works with the NTNCWS schools, not the CWS schools.

Hi Jennifer,

We have been in contact with Kellogg trying to get a copy of the latest version of the protocol. I will try to find out the status.

BTW, Francine did retire only moved to another office – Indian Affairs I believe.

Subject: HQ partnership with Kellogg Foundation (MI) on lead in schools
Importance: High

Hi, Ed. I remember back in 2012, Francine St. Denis, partnered with the Kellogg Foundation in MI, to sample for lead in schools at Calhoun County Health Dept (Paul Makoski). MDEQ, community water program (Richard Benzie) is looking for the sampling protocol that was used in that sampling effort. We at Region 5 were not involved in this project, so we did not receive a final report—if there was a final report. I'm pretty sure Francine has retired, so I'm wondering if you are aware of a final report, which would document the sampling protocol—not just first draw samples, but sequential sampling.

Thank you for checking this out, Ed. The State is looking for this tomorrow, if possible—yes, it's related to Flint.
