Subject: Flint 24inch transmission

Mike,

After doing a little digging, Phase 1 of the transmission main replacement project is out to bid and will close on May 14. The contractor will have 6 months to finish once awarded the contract.

The City has also budgeted \$2.5 million for each of FY16, FY17, and FY18 for the other 3 phases of the project.

We can keep an eye on it for now until the bid closing

Subject: Flint ACO DW Statement of Purpose revision

Revised language for the last paragraph of the statement of purpose is shown below.

Finally, if the Respondent proposes to reconstruct the system for the non-mechanical dewatering of its WTP residuals at the Site, then the Respondent will submit plans and specifications and secure from the DEQ, Office of Drinking Water and Municipal Assistance ("ODWMP"), a public water supply construction permit issued under Section 4 of the Safe Drinking Water Act, 1976 PA 399, as amended (Act 399), MCL 325.1001 et seq., and the administrative rules under Act 399 prior to initiating any construction, alteration, addition, or improvement to such system. A residuals management plan for the historical disposal of lime sludge and other WTP residuals, as well as lime sludge and any other WTP residuals generated in the future, must also be included as part of the construction permit application. The Respondent's proposal is based on its participation in the Karegnondi Water Authority (KWA) to receive source water from Lake Huron for its drinking water supply and the use of its water treatment plant to meet treatment requirements under Act 399. It will be approximately four years before the KWA infrastructure is built and water is available to the Respondent from KWA. The respondent plans to use the Flint River as its temporary source of untreated water supply until KWA water is available. The respondent must undertake the KWA public improvement project or undertake other public improvement projects to continue to use the Flint River, such as additional water treatment plant public improvements, source water protection public improvements and public improvements to obtain back-up water supply, in order to comply with Act 399.
