Subject: WaterRF webcast on lead sampling is scheduled
Date: Thursday, September 24, 2015 10:27:05 AM

Good morning state drinking water administrators -

One of the LCR topics being considered for the Long Term Revisions (LTR), is lead sampling. The current first draw sample gives an indication of lead in the water but additional samples, collected after this initial sample can yield higher results. The recent NDWAC LCR LTR work group considered the impact of the sampling scheme on the measured lead levels in their deliberations. A webcast early next month will share results of the WaterRF study that examined those lead sampling issues. The important details are shown below. Go to the [full announcement](#) for more information.

WEBCAST: Evaluation of Lead Line Sampling Strategies
Thursday, October 8, 2015
3 pm-4 pm ET (2 pm CT, 1 pm MT, 12 pm PT)

[Register online to view this Webcast](#)

The Webcast is free and open to the public.
