Subject: Coliform bacteria testing results

Kevin,

Good morning, attached are the results from coliform testing from samples delivered on 3/18/2014. All samples were good.

I apologize for the delay, we are undergoing major electrical upgrades, and have been running all week with partial power from generators. This left our computer and phone lines down the last 3 days. I figured you would know if something was bad, I would find a way to let you know. Have a good weekend.

Mike Glasgow
