Subject: Bromate Monitoring
Attachments: 2014 Flint MS startup.doc

Attached is a revised monitoring schedule for 2014 which now includes monthly monitoring for bromate. This is required for systems that use ozone. Your 1st sample needs to be collected by the end of September 2014 and monthly thereafter. Follow the link in the schedule to find a certified lab as the State Drinking Water lab no longer runs tests for bromate. Depending on results, monitoring may be reduced to quarterly after 1 year.

let us know if you have any questions.
