Subject: Meeting with Flint City and GCDC Office

At our last meeting we discussed a tentative meeting date of June 12th. However, Flint City is in the process of selecting a consultant to review the WTP on how to activate the plant on a daily basis, if needed. That consultant will not be on board until after the June 12 tentative meeting date.

Therefore, until a WTP consultant is selected the June 12 meeting is postponed until further notice.

It will be necessary to meet with MDEQ, on final design criteria, for the KWA project, but it is hoped we can schedule a joint meeting with both Flint City and GCDC to encompass both projects.

More later when the schedule can be firmed up. Any questions let me know.
