**Subject:** Yesterday's MLive story I mentioned

"Dave Murray, a spokesman for the governor, said Flint is currently producing water that meets all state and federal standards.

"It's unfortunate that the councilman made such incendiary and inaccurate remarks," Murray said in a statement to MLive-The Flint Journal. "The governor believes all Michigan residents need and deserve safe, clean water ...

"The state continues working with city leaders to help with the city's water infrastructure challenges, which were decades in the making. That assistance includes \$2 million in grants to help with pipeline leaks and other issues, which allow the city to prioritize its repairs. That's part of a long-term solution to the city's needs."
