

Is it a.) city workers or b.) DEQ workers or c.) EPA workers that test the water at the plant?

Fantastic! Just to clarify, the "non-detect" at plant is for lead -- NOT something else, correct? And these would be city workers, DEQ workers or EPA workers that test at the plant?

Thanks much -- as always.

Tests at the plant:

2015
 8-11
 5-12
 2-16
 1-22

2014
 8-6
 5-22

All were non-detect

Home tests:

July -- December 2014: City sent out 200 bottles, got 100 back. 90th percentile level was 6 ppb

Jan -- July 2015: City sent out 200 bottles, got 60 back. Apparently sent out more bottles and eventually got 69 samples. 90th percentile was 11 ppb.

Yesterday ☺

As soon as you can today. It's for a timeline that we'll add to a package of stories.

Hey Brad,

'Just making sure you saw this. Can you help me out? I know it's probably been a hellish couple of weeks, but for what it's worth -- weekend's almost here....

Robin
