

The city PR guy is also supposed to be sending out a news release this morning that concerns the TTHM and lead.

Is the city talking with you on this issue?

Brad:

Can you help me with some information from the DEQ regarding this email, sent by the U.S. EPA enforcement team leader in Region 5?

It seems to say the U.S. EPA has offered the city the assistance of a lead expert and sent the information to the DEQ as well. I'm following up the a PR contact at the U.S. EPA on this and about the more general federal interest in the lead in water issue in Flint.

Thanks,

Ron Fonger

Dear Mr. Woodson:

Thank you for your call on Friday.

In follow-up to your inquiry on U.S. EPA lead experts, I had a conversation with Dr. Darren Lytle, who is the Acting Chief of the Treatment Technology Evaluation Branch in the Water Supply and Water Resources Division within EPA's Office of Research and Development. Scientists within Dr. Lytle's branch have expertise in drinking water treatment including corrosion control to address lead contamination. We passed along Dr. Lytle's information to both MDEQ and Flint's Mayor, Dayne Walling, for consideration to work with Flint's Technical Advisory Committee.

You mentioned that you wanted to provide the Flint City Council with this information since Mayor Walling has not shared EPA's assistance offer with the Council. I have left a voicemail message with Councilwoman Monica Galloway regarding your inquiry since it is critical that the Council work with the City and the State to discuss next steps for the Flint Water system.

Please let me know if you have any follow-up questions.

Best wishes,

Heather
