Subject: Re: Flint follow-up question

Round one, as required by federal rule, was July -December (100 samples). Round two was Jan - July (69 samples because flints population dropped below 100k on some federal list).

Hey Brad,

Just want to check, when were the most recent water tests done in Flint of the 100 samples and 69 samples that came in under the 15 parts per billion requirement for lead? I got down in my notes it was last year, but just want to check.
